

Annalen der Physik

Volume 4

1995 (8th series)

pp. 1–810

Gegründet 1790 durch F.A.C. Gren

Fortgeführt durch L. W. Gilbert, J. C. Poggendorff,
G. und E. Wiedemann, P. Drude, W. Wien, M. Planck, E. Grüneisen,
F. Mögliche, H. Kopfermann, G. Richter, H.-J. Treder, W. Walcher

Herausgegeben unter Mitwirkung
der Deutschen Physikalischen Gesellschaft

Recognized by the European Physical Society

Editor

B. Mühlshlegel
Köln

Co-Editors

W. Demtröder
Kaiserslautern

K. Dransfeld
Konstanz

D. E. Khmel'nitskii
Cambridge

Volume 507 of the complete series

Contents

Number 1

Surface self-diffusion of quench condensed hydrogen films	
<i>J. Classen, K. Eschenröder, G. Weiss</i>	1
Phonon diffraction gratings	
<i>P.D. Vu, J.R. Olson, R.O. Pohl</i>	9
Cavitation bubble collapse studied at 20 million frames per second	
<i>C.-D. Ohl, A. Philipp, W. Lauterborn</i>	26
Chaotic cryptology	
<i>W. Martienssen, B. Hübinger, R. Doerner</i>	35
Disorder-induced local magnetic moments in weakly correlated metallic systems	
<i>A. Langenfeld, P. Wölfle</i>	43
The Feynman integrand for the perturbed harmonic oscillator as a Hida distribution	
<i>M. Cunha, C. Drumond, P. Leukert, J.L. Silva, W. Westerkamp</i>	53
Quantum fluctuations of vacuum stress tensors and spacetime curvatures	
<i>M.-T. Jaekel, S. Reynaud</i>	68
Erratum: Towards a theory of the integer quantum Hall transition: From the nonlinear sigma model to superspin chains, Ann. Phys. 3 (1994) 513	
<i>M.R. Zirnbauer</i>	89

Number 2

Brillouin scattering of vitreous silica under high pressure	
<i>S. Rau, S. Baeßler, G. Kasper, G. Weiss, S. Hunklinger</i>	91
Acoustic wavefront imaging	
<i>J.P. Wolfe, M.R. Hauser</i>	99
Phonon heating of two-dimensional exciton gases in GaAs/AlGaAs quantum wells	
<i>E.S. Moskalenko, A.L. Zhmodikov, A.V. Akimov, A.A. Kaplyanskii, L.J. Challis, T. Cheng, O.H. Hughes</i>	127
Determination of transition curves of high- T_c superconductors by phase contrast microscopy	
<i>Cl. Kriebel, O. Hoffels, R. Borowski, H. Gottschalk, H. Alexander, D. Wohleben</i>	136
Ferromagnetism in the Hubbard model: Spin waves and instability of the Nagaoka state	
<i>P. Wurth, E. Müller-Hartmann</i>	144
Variational study of isotropic spin-1 chains using matrix-product states	
<i>A. Schadschneider, J. Zittartz</i>	157

Number 3

The influence of thin helium films on the phonon spectrum of optically excited silicon

<i>F. Türk, G. Ullrich, H. Kinder</i>	165
Kapitza phonon transmission from clean H-silicon(111) surfaces into liquid helium	
<i>K.H. Wichert, C. Reimann, G. Blahusch, H. Kinder</i>	175
Microwave oscillator based on Bloch oscillations of electrons in a semiconductor superlattice	
<i>J. Grenzer, A.A. Ignatov, E. Schomburg, K.F. Renk, D.G. Pavel'ev, Yu. Koschurinov, B. Melzer, S. Ivanov, S. Schaposchnikov, P.S. Kop'ev</i>	184
Conductivity of a small metallic particle	
<i>F.C. Schaefer, R. v. Baltz</i>	191
Analytical results for the electronic shell structure in mesoscopic systems: Balian-Bloch type theory for spheres, discs, rings and anti-dot lattices	
<i>B. Tatievski, P. Stampfli, K.H. Bennemann</i>	202
Simulations of single polymer chains in the dense limit	
<i>P. Grassberger, R. Hegger</i>	230
New field equations in the 5-dimensional projective unified field theory	
<i>E. Schmutzer</i>	251

Number 4

Frequency multiplication of microwave radiation in a semiconductor superlattice by electrons capable to perform Bloch oscillations

<i>J. Grenzer, E. Schomburg, A.A. Ignatov, K.F. Renk, D.G. Pavel'ev, Yu. Koschurinov, B.Ja. Melzer, S. Ivanov, S. Schaposchnikov, P.S. Kop'ev</i>	265
Experiments with narrow movable beams of pulsed sound waves at 35 GHz	
<i>Th. Knöll, O. Weis</i>	272
Anharmonic renormalization and non-Markovian decay of coherent optical phonons in polar semiconductors	
<i>U. Wenschuh, W. Schäfer</i>	289
Ferromagnetism in the Hubbard model: instability of the Nagaoka state on the triangular, honeycomb and kagome lattices	
<i>Th. Hanisch, B. Kleine, A. Ritzl, E. Müller-Hartmann</i>	303
Maximum entropy approach to Schrödinger's radial equation	
<i>F. Garcías, M. Casas, A. Plastino</i>	329
Transition from $SU(2)_L \times SU(2)_R \times U(1)_{B-L}$ Representation to $SU(2)_L \times U(1)_Y$ by q -deformation and the corresponding classical breaking term of chiral $U(2)$	
<i>R. Bönisch</i>	345

Number 5

Preparation and pyroelectrical investigation of bimorph polymer layers

<i>S. Bauer-Gogonea, S. Bauer, W. Wirges, R. Gerhard-Multhaupt</i>	355
--	-----

On the waves and instability in self-gravitating magnetic molecular clouds with ambipolar diffusion	
Part 1: Planar modal approach	
<i>Z. Y. Yue, B. Zhang, G. Winnewisser, J. Stutzki</i>	367
Partial wave analysis in <i>K</i> -matrix formalism	
<i>S. U. Chung, J. Brose, R. Hackmann, E. Klempt, S. Spanier, C. Strassburger</i>	404
Solution of the Eliashberg equations for a very strong electron-phonon coupling with a low-energy cutoff	
<i>M. Weger, B. Barbiellini, T. Jarlborg, M. Peter, G. Santi</i>	431
Mesoscopic systems with fixed number of electrons	
<i>W. Lehle, A. Schmid</i>	451
Noise induced transport	
<i>A. Mielke</i>	476

Number 6

Investigation of positively charged acceptor states in Si and Ge under uniaxial stress by phonon induced conduction	
<i>P. Groß, K. Laßmann</i>	503
On the waves and instability in self-gravitating magnetic molecular clouds with ambipolar diffusion	
Part 2: Cylindrical modal approach and nonlinear effects	
<i>Z. Y. Yue, B. Zhang, G. Winnewisser, J. Stutzki</i>	526
A Machian interpretation of the cosmological constant	
<i>H. Liu, B. Mashhoon</i>	565
Event-enhanced quantum theory and piecewise deterministic dynamics	
<i>Ph. Blanchard, A. Jadczyk</i>	583
The statistical mechanics of kinetically-controlled RNA folding pathways	
<i>Ariel Fernández</i>	600

Number 7

Macroscopic intrinsic stress formation in amorphous CuTi films	
<i>S. Dina, U. Geyer, G. v. Minnigerode</i>	623
Variational approach to spin fluctuations in the Hubbard model	
<i>S. Dahm, W. Brenig</i>	634
Quantum statistics and discreteness. Differences between canonical and grand canonical ensembles for a fermionic lattice gas	
<i>R. Kutner, R. Przenioslo, M. Kwiatkowski</i>	646
Resonances in the current-voltage characteristics of a dissipative Josephson junction	
<i>J. Müllers, A. Schmid</i>	668
Quantum interference of charged identical particles	
<i>H. De Raedt, K. Michielsen</i>	679
Reflection time as an eigenvalue problem	
<i>C. Bracher, M. Kleber</i>	696

Number 8

Transport in a fluctuating potential	
<i>A. Mielke</i>	721
Topological investigation of the fractionally quantized Hall conductivity	
<i>T. Asselmeyer, R. Keiper</i>	739
The dynamics of disordered systems and the motion of vortices in disordered type-II superconductors	
<i>J. Müllers, A. Schmid</i>	757
Zero and finite temperature phase diagram of the spinless fermion model in infinite dimensions	
<i>G. S. Uhrig, R. Vlaming</i>	778
Generation of burst noise by nonlinear autoregression	
<i>J. Kumičák</i>	805
100 years ago	87, 164, 262, 354, 501, 621, 718, 809
